

Hope you come visit on the IECA tour on May 7th

Options for College Success is a non-profit organization that supports learning challenged post-secondary students to develop the skills, the confidence, and the courage necessary to transition into living independently and working productively. To this end, we provide:

Academic Support

Charlie is learning how to navigate his first online college class. Each one of our students meets for academic support two times a week per class.

Career Development

Julia is practicing her interviewing skills with our career adviser. Students pursuing careers meet weekly with the adviser to assist in obtaining and excelling in a job.

Independent Living Skills

Robert is completing his laundry during one of his independent living skills sessions. During these sessions, students develop skills to learn how to live in apartments independently.

Finance Management

Julia is learning how to budget her money using a cash envelope system. Each of our residential students have a weekly budgeting meeting with our Student Services Coordinator.

Social Events

Students are enjoying racing go-karts at one of our social events! We plan a social calendar for each month full of many different fun activities.
